Experience

Nov. 15 - Now — **Software Developer** — Cambio Software Engineering

I am working in automation team in configuration management team as a software developer. My responsibility is to automate manual tasks in continuous delivery, continuous integration and management tools. On that tasks I developed various tools using various technologies. Mainly I developed tools using maven-plugins(MOJO), JAVA and various devops technologies. Recently I am working in "Git Migration" sub project in "Tiger Infrastructure Project"

Oct. 15 - March. 16 — **Internship** — IFS RD

I worked with "Technology" team and two distinct internal projects during my internship. I developed one internal application and a research project. In that period I exposed to ASP.NET, ORACLE 11G/12C, PLSQL, ANDROID and JAVA.

Education

Aug. 13 - June 15 — **BSc in IT and Information Systems** — University of Agder, Kristiansand

An IT and Information Systems education focused on the interdisciplinarity of systems development and project/business management subjects.
Title of the Thesis: "The Reengineering of Frontica Business Solutions' Information Quality System". Grade **A**.

Aug. 09 - June 12 — **University Admissions Certification** — Toppidrettsgymnaset i Telemark, Skien

Top-level Sports Upper secondary school. Main subjects: Football (soccer), International English, Sociology and Social Anthropology, Politics and Human Rights, Social Studies English.

Projects

Oct. 16 - Now   **Brobet API & Android app** Project with Sondre Sallaup

Spare time project with Sondre Sallaup, where I created and maintained the backend stack and native Android application. Backend stack consisted of a NodeJS (v6.x LTS) TypeScript GraphQL API with a PostgreSQL database using the ApolloStack libraries/toolset, ExpressJS http/ws server framework and Twitter Digits for authentication. Private repo.

Aug. 15 - Oct. 15   **UiA Schedule for Android** EnterCon project

An Android application for displaying the schedule is a user-friendly, mobile-friendly manner. The scraping-logic from the C# Schedule Scraper below was ported to Java so that the app runs natively. Github repository.

June 15   **UiA Schedule Scraper** Solo project

A C# console application scraping university programme schedule information of their webpage, outputting JSON. Github repository.

Certifications

Oct. 15   **PRINCE2 Foundation certification** University of Agder, Kristiansand

Foundation-level Project Management certification.
